## CAREER OBJECTIVES

---

Results-driven and highly skilled DevOps Engineer with 5+ years of hands-on experience in Cloud Infrastructure, automation, and CI/CD seeking a growth-oriented carrier in the world of information and Cloud Technologies, where I have more scope to learn, teach & nurture my knowledge by working on diversified protocols of applications.

---

## EXPERIENCE SUMMARY:

---

- Around 5+ years of experience in the fields of automation, configuration management and cloud services.
- Experience in RedHat Linux System Administration.
- Hands on experience in **AWS** provisioning and in-depth understanding on AWS services like **EC2, S3, Glacier, ELB, RDS, IAM, Route 53, VPC, Auto scaling, Cloud Front, Cloud Watch, Security Groups** and **Lambda**.
- Experience in managing infrastructure resources in cloud architecture with close coordination with various functional teams.
- Expertise in writing **Ansible** playbooks, to configure the AWS servers, services.
- Hands on on **Docker**.
- Experience in creating Docker files.
- Hands on experience on different type of **Kubernetes** clusters setup like **EKS**.
- Provision of **EKS clusters** using **Terraform**.
- Experience in writing **Kubernetes manifests files** to deploy Kubernetes resources like **Deployment, service, replica sets, Ingress controllers** and Ingress, config map.
- Experience in installing, configuring, and administering **Jenkins**.
- Experience with version control systems like **GIT**.
- Hands-on experience on **Cloudwatch** to monitor services like EC2, RDS, ELB.
- Monitored system performances and application logs using **Prometheus** and **Grafana**, ensuring system health and reliability.
- Experience on **Jira** tool.
- Good experience on **Terraform and Terraformer**.
- Automating AWS services using Terraform.
- Experience in understanding **Terraform variables, modules, providers** and **output**.
- **Monitor, build and deploy** software releases and provide support for production deployments.
- Experience in troubleshooting build and deployment failures.
- Worked on Jenkins for **continuous integration** and end-to-end automation of all builds and deployments, including pipeline job setup and upstream/downstream job configurations.

---

## TECHNICAL SKILLS:

---

Operating Systems	<b>Ubuntu, RHEL</b>
Amazon Web Services	<b>AWS EC2, ELB, VPC, RDS, IAM, Route53, S3, Cloud Watch, Cloud Front, EBS, SNS, EBS, NAT Gateways, Subnets, Security Groups, IAM Roles</b>
Build/Automation Tools	<b>Maven, Ansible, Jenkins, Docker, Kubernetes.</b>

Databases	<b>MySQL, RDS</b>
Scripting Languages	<b>Shell Scripting, YAML, Groovy</b>
Version Control Tools	<b>GIT Hub</b>
Monitoring Tools	<b>Cloud Watch, ELK</b>

Bug Tracking Tool	JIRA
-------------------	------

---

## EDUCATION QUALIFICATION:

---

- Post-Graduation from FANSHAWE COLLEGE, London, Ontario, CANADA – August 2019
- Bachelor of Technology from JNTU, Hyderabad - 2017.

---

## WORK EXPERIENCE:

---

**HELPSHIFT TECHNOLOGIES PVT LTD**  
2025)

(March 2025 - July

**COREFRONT TECHNOLOGIES PVT LTD**  
March 2025)

(March 2022 -

### DevOps/AWS Engineer

- Responsible for planning, coordinating, and executing Dev Ops projects.
- Involved extensive work towards code compilation, packaging, building, debugging, automating, managing, tuning, and deploying code across multiple environments and Linux Administration.
- Worked on Amazon Cloud Services and its features (**AWS EC2, VPC, EBS, AMI, snapshots, Autoscaling, Lambda, SES, SNS, RDS, ELB, EBS, CloudWatch, S3** etc.).
- Worked closely with application team and support on various performance and configuration issues on daily basis and planned release schedules with agile methodology.
- Experience in creating and building S3 buckets, managed policies and used S3 bucket and Glacier for storage and backup on AWS. Configured S3 to host Static Web content.
- Performed all necessary **GIT** configuration support for different projects and worked on branching, versioning, labeling, and merging strategies to maintain GIT repository and GIT Hub.
- Re-sizing multiple RDS instances to make cost effective environment.
- Created automated CloudWatch dashboards for EC2 instances through lambda function.
- Assigned Roles and Policies to Users and Security Groups by using Identity and Access Management (**IAM**) for improved login authentication.
- Defined AWS Security Groups which acted as virtual firewalls that controlled the traffic allowed to reach one or more AWS EC2 instances.
- Setting up Elastic Load Balancer to distribute incoming application traffic across multiple EC2 instances having excellent knowledge on Amazon S3, SNS/SQS, Route53 and other services of AWS Family.
- Deployed EC2 instances, attached security groups, attached profiles and roles using Terraform
- Implemented a production ready, load balanced, highly available, fault tolerant Kubernetes infrastructure and created Jenkins jobs to deploy applications to **Kubernetes Cluster**.
- Creating CDN for reducing network latency and improve the performance of the website. (CloudFront).
- Worked on CI/CD tool Jenkins to automate the build process from version control tool into testing and production environment.
- Worked on Bridge cases (Sev1, Sev2, Sev3, Sev4 - Fault analysis & resolution), raising incidents, and closing cases. Performed health Checks and Status reporting on executive calls.
- **Created EBS volumes and attaching to instances and creating partitions and drives.**
- Worked with Groovy scripts in Jenkins to execute jobs for a continuous integration pipeline where Groovy Jenkins Plugin and Groovy Post Build Action Plugin are used as a build step and post build actions.
- Lead end-to-end management of **AWS Reserved Instances and Savings Plans** across multiple regions and instance families.
- Achieved significant cost savings (up to 56%) through deep analysis of usage patterns, RI/SP purchase planning, renewals, and rightsizing efforts.
- Developed automation using AWS CLI, Cost Explorer, and CUR to track utilization, identify underused resources, and optimise commitment coverage.
- Partnered with finance and engineering teams to forecast compute demand, avoid redundant commitments, and align cloud spend with business priorities.
- Reduced on-demand usage by migrating critical workloads under RI/SP coverage and decommissioning redundant resources.

## **INNOMINDS SOFTWARE PVT LTD**

**(July 2021 – February 2022)**

### **DevOps Engineer**

- Supported 24x7 production computing environments. Experience providing on-call and weekend support.
- Installed and worked on configuring **AWS CLI**.
- Deploying and validating the applications automated through the **Jenkins pipeline** using **pipeline groovy script**.
- Used **JIRA** as the bug tracking tool to review and fix the bugs and as Scrum Agile tool.
- Performed major & minor upgrades instances using command & GUI mode.
- Strong knowledge and understanding of network technologies (TCP/IP networking, SSL, Firewall, Proxy, Load Balancing).
- Worked on LVM and Disk management. Good Knowledge in Managing Partitions and File Systems.

## **CAPITAL TECHNOLOGIES LIMITED**

**(December 2019 – June 2021)**

### **DevOps/AWS Engineer**

- Defined branching, labeling, and merge strategies for all applications in Git.
- Created **Docker images**, **Docker containers** and pushed to Docker hub Registry.
- Extensive knowledge on working with cloud watch graphs.
- Deployed applications in **Nginx** server.
- Created email notification once the job is failed.
- Creating **AMI's** from instances.
- Creating snapshots for volumes.
